

TETRA GEAR

User Guide

Controller

Power / Flashing Mode Button

Press & Hold - Turn on/off

Tap - Change flashing modes

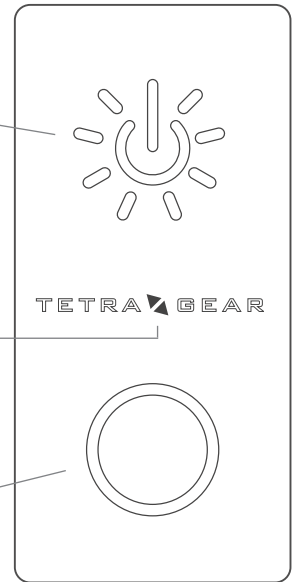

Power Indicator

Lights up when controller is ON

Colour Mode Button

Tap - Change colours

Press & Hold - Select custom colour

Turning On/Off

Press and hold the power button for two (2) seconds to turn the controller on. To turn it off, press and hold the power button until the LED light cascade ends. Releasing the button early will abandon the shut-down.

Custom Colour

Press and hold the colour mode button to transition through all available colours. When a desired colour is found, release the button. The selected colour is stored as the custom colour and can be changed at anytime.

Changing Flashing Modes

Tap the power button to change flashing modes. Use two fingers or the palm of your hand when tapping the buttons for optimal response.

Changing Colours

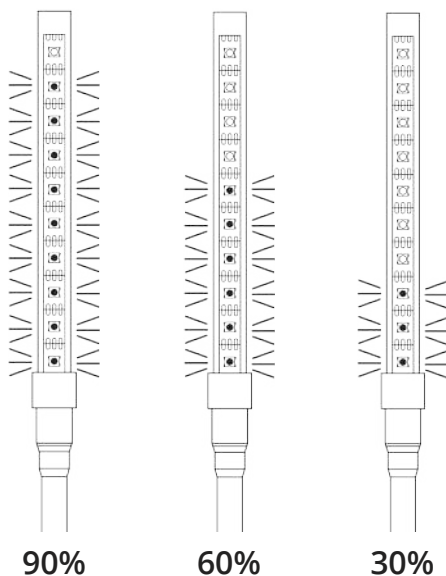

Tap the colour mode button to cycle through colour options. Options include: red, green, blue, white, rainbow, and a custom colour.

Battery & Charging

Battery Info

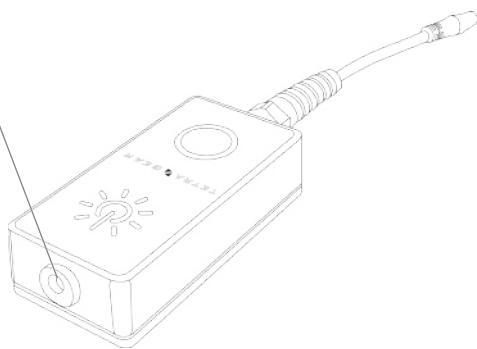

When first powered on, the light strip will indicate the charge level for two (2) seconds. The colour of the lights during start-up will also indicate the level of charge with red indicating low battery.

The battery life of the device is dependent on the colours and modes selected. Use time is typically from 4 hours with solid white, to 10+ hours with coloured flashing modes.

Charge Port

To charge the internal battery, use the provided charger and insert the barrel plug into the charge port at the end of the controller.

****Caution:** Only use the 4.2V DC lithium battery charger provided with this device. Using an incompatible charger could cause damage to the device and/or personal injury. Do not unscrew backplate as this will damage the waterproof seal of the box.
